

E2051-99 Standard Practice for the Determination of Lead in Paint, Settled Dust, Soil and Air Particulate by Field-Portable Electroanalysis

1. Scope

- 1.1 This practice covers the analysis of extracts of environmental samples for lead content using field-portable electroanalytical devices.
- 1.2 Matrices of concern in this practice include paint, settled dust, soil, and air particulate.
- 1.3 This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.
